

Chapter 4 - Integration

Class Notes - Mathematics (English)

1. Integration is the reverse process of differentiation.
2. Integral of $x^n dx = x^{(n+1)}/(n+1) + C$, $n \neq -1$.
3. Integral of $1/x dx = \ln|x| + C$.
4. Integral of $e^x dx = e^x + C$; of $\sin x dx = -\cos x + C$.
5. Definite integral = area under the curve.
