

Unit 1 - Motion

Class Notes - Physics (English)

1. Motion is change of position with time.
2. Distance is scalar; displacement is vector.
3. Speed = distance / time. Velocity = displacement / time.
4. Equations of uniformly accelerated motion:
(a) $v = u + at$ (b) $s = ut + \frac{1}{2}at^2$ (c) $v^2 = u^2 + 2as$
5. Newton's First Law: inertia.
6. Newton's Second Law: $F = ma$.
7. Newton's Third Law: every action has equal and opposite reaction.
8. Sample placeholder note - replace with your real PDF.
